**BELLY**

## RIGHT LEGS

## FRONT

## LEFT LEGS

## MIDDLE

## REAR

### BUILDING THE FEET:

Start with the ball feet then attach the leg pieces.

Glue onto the body using tabs.

### BUILDING THE WINGS:

Assemble the outer wings. Shape the inner wings by cutting them into long ovals.

I recommend gluing the outer wings first. Use good glue!

You can support with folded up tissues while drying. To attach the inner wings, put a good glob of glue on the tip and insert into place.
