Building Tips:

Assemble the tail (parts 1-4), right leg (parts 5, 6) and left leg (parts 7, 8) completely, and then glue them to the bottom (part 9). Glue part 10 and close it at the back of the model, then glue part 11. Now assemble the arms: the right one (parts 13-15) and then the left one (parts 15-17). Glue the assembled arms to the main body. Then proceed by gluing the front neck (part 18) and the back neck (parts 19, 20). Glue the lower part of the head (part 21) to the neck, and then glue part 22 to the back of part 21. Proceed by gluing part 23, and parts 24 and 25 on the back of it. Glue the ears and close the model at the tip of the right one (see picture below).
